

This concerns RM-10787. I am W4NI. I ask the Commission to dismiss this petition as an affront to the intelligence of radio amateurs.

It will serve no public purpose but will only lessen emergency preparedness. This petitioner is particularly offensive to the Commission, as he seeks to drag others down to his own level of incompetence. The Commission should rebuke this person explicitly for wasting precious Commission resources and trying to ruin the Amateur Radio service by stripping it of vital communications ability. The Commission must preserve the Amateur Radio service as a highly trained and highly motivated asset to the nation.
